BXST

Voltage protector

Model： BX-V105

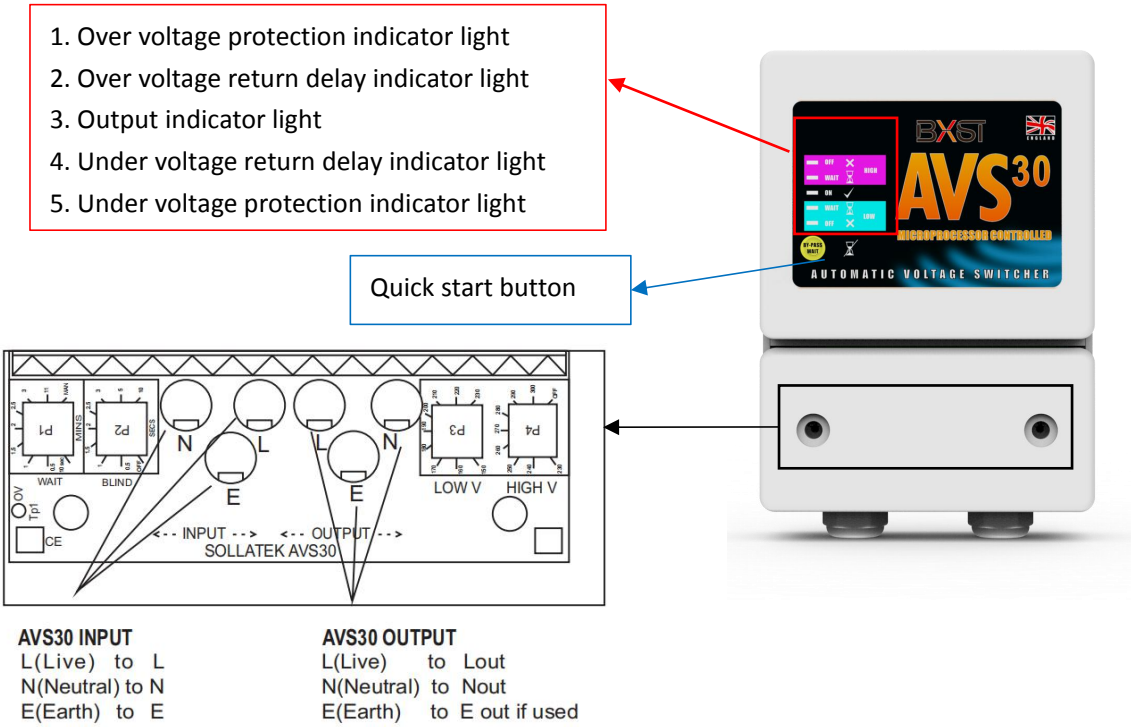
Introduce

Bx-v105 is a home connected voltage protector. Suitable for TV, computer, refrigerator and other types of electrical equipment with power less than 6600w.

Specification

Working voltage/Frequency	220VAC/50HZ-60HZ
Under voltage	150-230VAC
Over voltage	230-300VAC
Max working power and current	6600W/30A
Delay time	10S - 10Min
Warranty time	1Year
Working environment	-10℃～+65℃
Shell material	ABS

Function



AVS30 INPUT
L(Live) to L
N(Neutral) to N
E(Earth) to E

AVS30 OUTPUT
L(Live) to Lout
N(Neutral) to Nout
E(Earth) to E out if used

Characteristics

1. Over / under voltage: when the voltage exceeds the limit value, the power supply will be cut off automatically to prevent the damage to the electrical appliances caused by the voltage too high or too low.
2. Adjustable over / under voltage: users can adjust the over / under voltage protection value according to the actual use environment.
3. Adjustable delay: users can adjust the delay time according to the actual use environment.
4. Lightning protection: lightning protection, surge protection, and damage of protective appliances and protectors due to lightning and other severe weather.
5. Digital display: real time display of product working state

Warning

※The total power of the connected electrical equipment shall not exceed the rated power.

※This product cannot be used in a humid, non-ventilated environment.

※Non-professionals are not allowed to open, modify, repair or maintain this product.

※ Poor contact at the front end or poor contact at the insert may cause danger.

※ It is forbidden to burn or keep away from fire.
